Affordable and Simple Electronic Document Management

- affordable and very easy to deploy and use on a day-to-day basis
- organizes documents in exactly the same way that your documents are organized today - only electronically
- Documents can be retrieved from all the old familiar locations in seconds rather than minutes.
-

Most large corporations have implemented Electronic Document Management Systems (EDMS) to store and catalogue their information, but small and mid-sized companies have found these “big company” solutions to be far too expensive for their budgets. eDrawer is the only full-featured EDMS on the market that is priced to meet the needs of companies of all sizes.

Digital document management is not a luxury—it is an imperative for companies of all sizes. Electronic document management has been proven to reduce costs and improve productivity by reducing or eliminating the need for expensive physical storage of documents and staff time devoted to time-consuming paper-based processes.

TECHNICAL SUPPORT

Telephone or chat support
